

1. Agency & User Management

Module:

Agency setup and access control.**Key features:**

- Agency profile (name, branding, contact info, working hours).
- Branches/offices and team structures.
- User roles: Owner, Manager, Recruiter, Compliance Officer, Client User, Candidate.
- Role-based permissions (RBAC) for modules and actions.
- Login security and activity logging (logins, password resets, access denials).

2. Job & Vacancy Management

Module:

Job requisition and vacancy lifecycle.**Key features:**

- Create job records with title, role type, location, rate, shift pattern, client, urgency.
- Role-specific requirements and mandatory compliance items.
- Job templates for common roles (care assistants, support workers, nurses, domiciliary carers).
- Job status control: open, paused, on hold, filled, cancelled, archived.
- Counters per job: applicants, shortlisted, interviews, placements.

3. Candidate Intake & Profiles

Module:

Application capture and candidate master records.**Key features:**

- Web application forms and job links.
- Recruiter-created manual candidates.
- Capture consent, contact details, location, preferences, experience summary, availability.
- CV/document upload at application stage.
- Duplicate detection (email, phone, other identifiers).
- Unique candidate ID and single master profile per person.
- Tags and classification (skills, seniority, region, compliance status, source).
- Custom candidate fields defined per agency.

4. CV Parsing & AI Extraction

Module:

CV upload and parsing.**Key features:**

- Upload PDF/DOC/DOCX CVs.
- AI extraction of structured data: personal info, work history, education, certifications, skills, availability, summary.
- Populate candidate profile automatically from CV.
- Mark extracted fields as AI-generated until reviewed.
- Recruiter review/approve/edit workflow before treating data as verified.
- Store original CV alongside structured data.

5. Screening & Matching

Module:

Screening rules and AI-assisted ranking.**Key features:**

- Configurable screening criteria per job (must-have vs nice-to-have).
- Knockout rules for missing Right to Work evidence, DBS-related docs, invalid registration, wrong location, incompatible shifts.
- Fit scoring and ranking using rules + AI suggestions.
- Transparent reasons for recommendations (matched skills, missing docs, experience, location mismatch).
- No automatic “hard rejections” by AI alone by default; recruiter review required (aligns with ICO guidance on meaningful human involvement).
- Manual override and notes on decisions.

6. Pipeline & Shortlisting

Module:

Candidate pipeline management.**Key features:**

- Status workflow: New → Under Review → Awaiting Documents → Compliance Review → Shortlisted → Submitted → Interviewing → Offered → Placed → Rejected/Archived.
- Kanban board view with drag-and-drop stages.
- List views with filters and bulk actions.
- Shortlist pack generation:
 - Candidate summary.
 - Verified qualifications.
 - Compliance checklist status.
 - Interview notes.
 - Attachments (CV, documents).
- Manager approvals for shortlisted candidates before client submission.
- Timeline and audit of who changed which status and when.

7. Compliance & Credential Management

Module:

Compliance tracking (first-class module).**Key features:**

- Compliance item types:
 - Right to Work documents.
 - DBS / disclosure evidence.
 - Professional registrations (NMC, etc.).
 - Training certificates.
 - ID and proof of address.
 - References.
 - Vaccination/health records (where lawful).
 - Custom items per agency/role.
- Role-specific compliance checklists.
- Upload, view, and manage documents per compliance item.
- Store issue date, expiry date, check status, verifier notes.
- Dashboards for:
 - Missing items.
 - Expired items.
 - Expiring within X days.
 - Pending verification.
- Manual verification outcomes: Pending, Valid, Rejected, Needs Follow-up, Expired.
- Full audit trail for all compliance actions.

8. Communication & Templates

Module:

Candidate communication and templates.**Key features:**

- Log email and (optionally) SMS/other channels against candidates/jobs.
- Pre-built message templates:
 - Interview invitations.
 - Document requests.
 - Follow-ups.
 - Rejection emails.
 - Offer/conditional offer communications.
- Bulk messaging to filtered candidate lists (within consent and policy constraints).
- Message status tracking (sent, delivered, opened, failed, replied) where integrations allow.

9. Interview Scheduling

Module:

Interview coordination.**Key features:**

- Recruiter-scheduled interviews or self-booking by candidates.
- Interview types: phone, video, in-person, client-side.
- Slot selection based on recruiter/interviewer availability.
- Automated invites, reminders, reschedule notices, and cancellations.
- Calendar integrations (e.g., Outlook, Google Calendar).
- Recording interview outcomes, notes, scorecards, no-show status.

10. AI-Assisted Interview Support

Module:

AI support for interviews (optional).**Key features:**

- Generate question packs tailored by role, seniority, skills, and compliance needs.
- Summarise interview notes or transcripts where recordings and lawful consent exist.
- Provide structured feedback suggestions (strengths, risks, follow-up questions).
- Explicit guardrails: AI does not make final hiring decisions; recruiters remain accountable.

11. Document & Template Generation

Module:

Template-based document generation.**Key features:**

- Templates for:
 - Candidate submission summaries.
 - Interview invitations.
 - Document request letters/emails.
 - Offer and conditional offer letters.
 - Compliance summaries.
 - Reference request forms.
 - Internal approvals.
- Merge fields from candidate, job, client, agency.
- Version control for templates.
- Permission-based editing (e.g., managers only for offers).

12. Client Submission & Feedback

Module:

Client-facing submissions (lightweight portal or secure links).**Key features:**

- Submit candidate packs via:
 - Secure link.
 - Email summary.
 - Optional client portal view.
- Client can:
 - View candidate details and compliance summaries.
 - Accept/reject candidates.
 - Request interviews.
 - Ask for more info or give written feedback.
- Log client decisions and timestamps into the candidate timeline.

13. Reporting & Dashboards

Module:

Analytics and reporting.**Key features:**

- Recruiter dashboard (pipeline, tasks, upcoming interviews).
- Manager/Owner dashboards (funnel performance, compliance risk, recruiter productivity).
- Key metrics:
 - Time to review.
 - Time to shortlist.
 - Time to interview.
 - Time to submit.
 - Time to place.
 - Stage drop-off.
 - Compliance readiness (e.g., % “ready to submit”).
 - Interview no-show rates.
 - Client response times.
 - Source/channel performance.
- Filters (client, branch, recruiter, role type, date range, job category).
- Exportable CSV and printable report views.

14. Notifications & Task Management

Module:

Alerts and tasks.**Key features:**

- Notifications for:
 - New applications.
 - Candidates needing review.
 - Missing or expiring documents.

- Interview events (booked/changed).
- Client feedback.
- Offers awaiting approval.
- Candidate inactivity.
- Task assignment to recruiters/compliance officers.
- Due dates, priorities, and escalation rules.

15. Search & Talent Pools

Module:

Search, filters, and talent pools.**Key features:**

- Advanced search with structured filters (role type, location, availability, training, registration, doc status, source, experience level).
- Keyword search over CVs and notes.
- Saved searches and reusable segments.
- Smart lists (e.g., “ready to submit”, “awaiting compliance”, “expiring in 30 days”, “interview-ready”).

16. Audit & Governance

Module:

Audit trail and data protection controls.**Key features:**

- Detailed activity logs per candidate, job, and user:
 - Record creation/edits.
 - Status changes.
 - Document uploads.
 - Compliance decisions.
 - Submissions and offers.
- Consent capture and logging.
- Retention rules (archive/delete based on agency policy and law).
- Access control to sensitive and special-category information.
- Candidate-facing notices and AI usage explanations (aligned with ICO guidance on AI in recruitment).

17. Integrations Layer

Module:

External connections (optional/modular).**Key features:**

- Email service integration.
- Calendar integration.
- SMS/messaging providers.

- Job boards and advertising platforms.
 - Cloud storage.
 - Identity/background check providers.
 - E-signature tools.
-

MVP view (if you want it super focused)

For an MVP, you'd likely implement these modules first:

- Agency & User Management
- Job & Vacancy Management
- Candidate Intake & Profiles
- CV Parsing & AI Extraction
- Screening & Matching
- Pipeline & Shortlisting
- Compliance & Credential Management
- Interview Scheduling
- Communication & Templates (basic)
- Reporting & Dashboards (core metrics only)
- Audit & Governance (minimum viable logging)

Then layer on AI interview support, client portals, deeper integrations, etc., in later phases.
